(54) Title: GARMENT FOR WOMEN

(57) **Abstract:** The invention relates to a women's garment com-
prising a front piece and a back piece, which together form a
body-enclosing casing, in which a neck opening (3), two arm-
holes (4) and at least one lower opening (5) are included, the
front piece being composed of a top piece (10) and a bottom piece
(11), which are separated via a transverse, slit-like access open-
ing, which is delimited by an upper edge of the bottom piece (11),
and a lower edge (12) of the top piece (10), the bottom piece (11)
being formed with a tab (14), which is fastened on the inside of
the top piece (10) and separates two recesses (19) for the housing
of breasts. According to the invention the tab has a tapered ba-
sic shape and is delimited by arched limiting edges (17), which
transform into likewise arched limiting edges (18), which form
the upper edge of the bottom piece (11) and which generally have
an arc radius that is smaller than the arc radius of the tab limiting
edges (17).
